The results are made known immediately. If you fail the test, you must book it again at a future date and will pay again.</p> <p><b>How and where can I do the exam?</b></p> <p>You can take your official exam at any authorised test centre in any country in the world. You can find a list of authorised centres on the internet or send us an email.</p>  |
| <p><b>Course Contents</b></p> <p><b>Audience</b></p> <p>The primary audience for this exam is BI Architect. BI Architects are responsible for the overall design of the BI infrastructure, including how it relates to other data systems in use. Primary responsibilities may include:</p> <ul style="list-style-type: none"> <li>• BI Solution architecture and design</li> <li>• Provisioning of software and hardware</li> <li>• Data warehouse and data mart design</li> <li>• Online Analytical Processing (OLAP) cube design</li> <li>• Integration with SharePoint or line of business applications</li> </ul> <p><b>Skills Being Measured</b></p> <p>This exam measures your ability to accomplish the technical tasks listed below. The percentages indicate the relative weight of each major topic area on the exam. The higher the percentage, the more questions you are likely to see on that content area on the exam.</p> <p>The information after "This objective may include but is not limited to" is intended to further define or scope the objective by describing the types of skills and topics that may be tested for the objective. However, it is not an exhaustive list of skills and topics that could be included on the exam for a given skill area. You may be tested on other skills and topics related to the objective that are not explicitly listed here.</p> <p><b>Plan Business Intelligence (BI) Infrastructure (15%)</b></p> | <p><b>Frequently Asked Questions</b></p> <p><b>Where is the course held?</b><br/>All training is handled at our Greenpoint training centre in Cape Town, South Africa.</p> <p><b>What other branches do you have in SA or in the world?</b><br/>We only train in Cape Town.</p> <p><b>What books do I get with this course?</b><br/>You will receive a course text book which you can take away with you to keep after the course.</p> <p><b>What are the dates for the course?</b><br/>See our schedule page:<br/><a href="http://www.i2ko.com/Schedule_All.html">http://www.i2ko.com/Schedule_All.html</a></p> <p><b>Does the price include the official exams?</b><br/>No, the exams are not included in the price. Exam prices vary from centre to centre.</p> <p><b>What about accommodation?</b><br/>Accommodation is available close to our centre and is quoted on single accommodation apartment, each person with own bedroom and bathroom.</p> <p><b>Can I do the course without accommodation?</b><br/>Accommodation is entirely optional and is quoted separately to the course fee.</p> <p><b>Included in your course fees:</b></p> <ul style="list-style-type: none"> <li>• Tuition fees</li> <li>• Breakfast daily at the training centre (where applicable)</li> <li>• Teas and coffees</li> <li>• Lunches daily</li> <li>• Attendance certificate</li> </ul> <p><b>How to enroll</b></p> |

- Plan for performance.
- Plan for scalability.
- Plan and manage upgrades.
- Maintain server health.

**Design BI Infrastructure (16%)**

- Design a security strategy.
- Design a SQL partitioning strategy.
- Design a backup strategy.
- Design a logging and auditing strategy.

**Design a Reporting Solution (24%)**

- Design a Reporting Services dataset.
- Manage Excel Services/Reporting for SharePoint.
- Design a data acquisition strategy.
- Plan and manage reporting services configuration.
- Design BI reporting solution architecture.

**Design BI Data Models (34%)**

- Design the data warehouse.
- Design a schema.
- Design cube architecture.
- Design fact tables.
- Design BI Semantic Models.
- Design and create MDX calculations.

**Design an ETL Solution (11%)**

- Design SSIS package execution.
- Plan to deploy SSIS solutions.
- Design package configurations for SSIS packages.
